

Blockliance is a regtech product that helps you monitor, test, verify and prove that your team, department, business unit and entire corporation is adhering to the data regulations, procedures, operations, computations and configurations that you and external parties think it is.

While you maintain control, on a voluntary and confidential basis, it facilitates:

- ✓ Compliance to external regulatory frameworks and rules.
- ✓ The smooth passing of audit.
- ✓ Reduced audit costs.
- ✓ Custom and arbitrary internal checklists and procedure verification with full visibility and implicit trust.

Blockliance enables these capabilities and more from anywhere in the world, allowing verification and proof to be a simple, easy, low cost interaction on demand.

Support for different interpretations of regulations, flexibility for custom requirements and a platform for internal checklists make Blockliance the ideal compliance solution for your company. Built for your particular compliance footprint, **Blockliance** facilitates a frictionless attestation and verification process for all types of situations.

- ✓ **WIDE REGULATORY SUPPORT** - Organisations of all types can benefit from Blockliance's ability to cater to custom and flexible regulatory frameworks and checklists.
- ✓ **CUSTOMISABLE COMPLIANCE** - While pre-written modules for popular compliance problems are part of Blockliance, organisations are empowered by the ability to create custom regulations for their own purposes.
- ✓ **DATA WITHOUT THE RISK** - Organisations can create internal checklists to match their existing business-as-usual processes and verify their compliance to themselves internally in an efficient and trusted way.
- ✓ **FLEXIBILITY COMES AS A STANDARD** - Blockliance allows organisations who apply existing frameworks in custom ways to do so with ease and minimum friction.
- ✓ Regardless of an organisations compliance needs, Blockliance holds the answer by enabling complete control, ultimate flexibility and implicit trust between organisations and auditors.

Global Solution for Governance, Risk & Compliance Problems
